

Raw population estimates, discrete areas

The chart displays the distribution of 1000 samples across five categories: blue, green, orange, red, and purple. The x-axis represents the sample index from 0 to 1000, and the y-axis represents the count for each category. The blue category starts at 0 and grows to approximately 100. The green category starts at 0 and grows to approximately 200. The orange category starts at 0 and grows to approximately 300. The red category starts at 0 and grows to approximately 100. The purple category starts at 0 and grows to approximately 100. The total count reaches 1000 by the end of the samples.

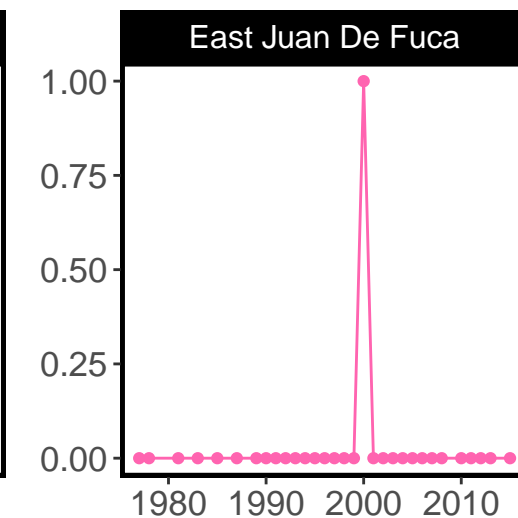

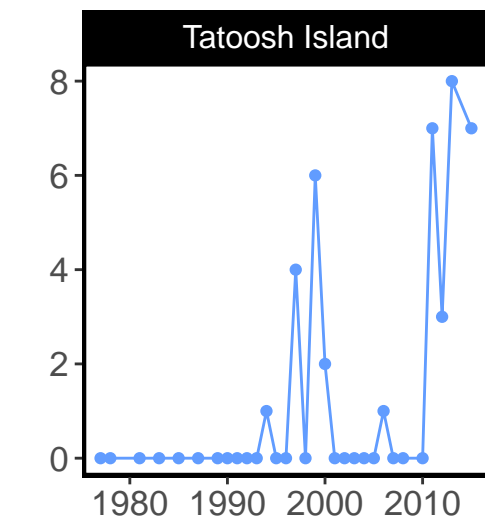

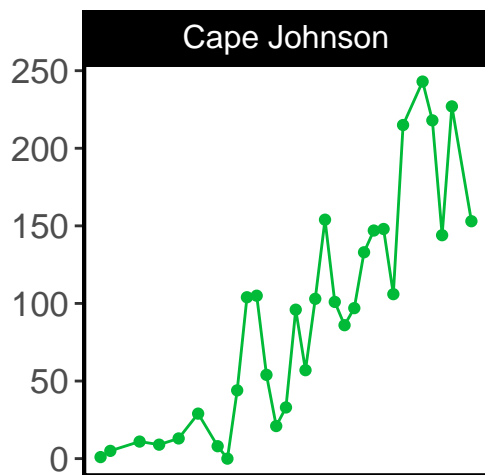

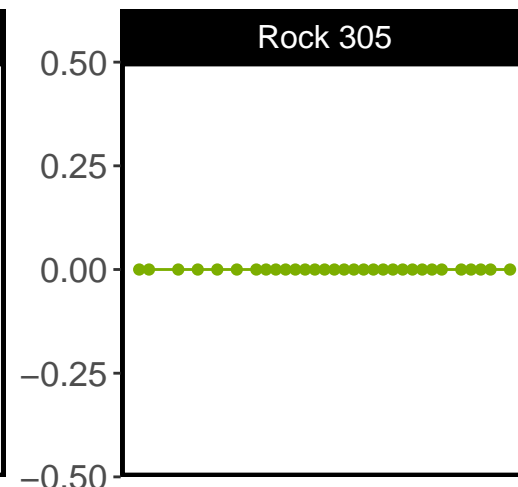

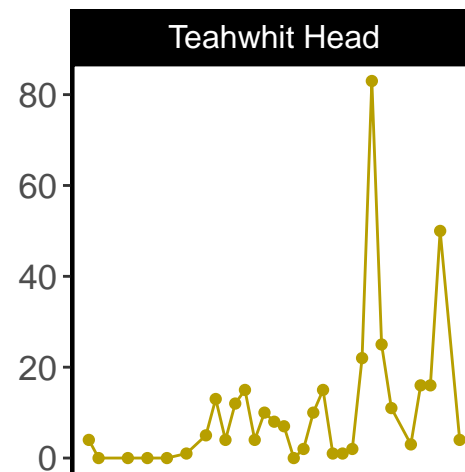

Raw population estimates, discrete areas

Raw population estimates, discrete areas

Number of Sea Otters

Year

Proportional Distribution; kernel = 10.2

location

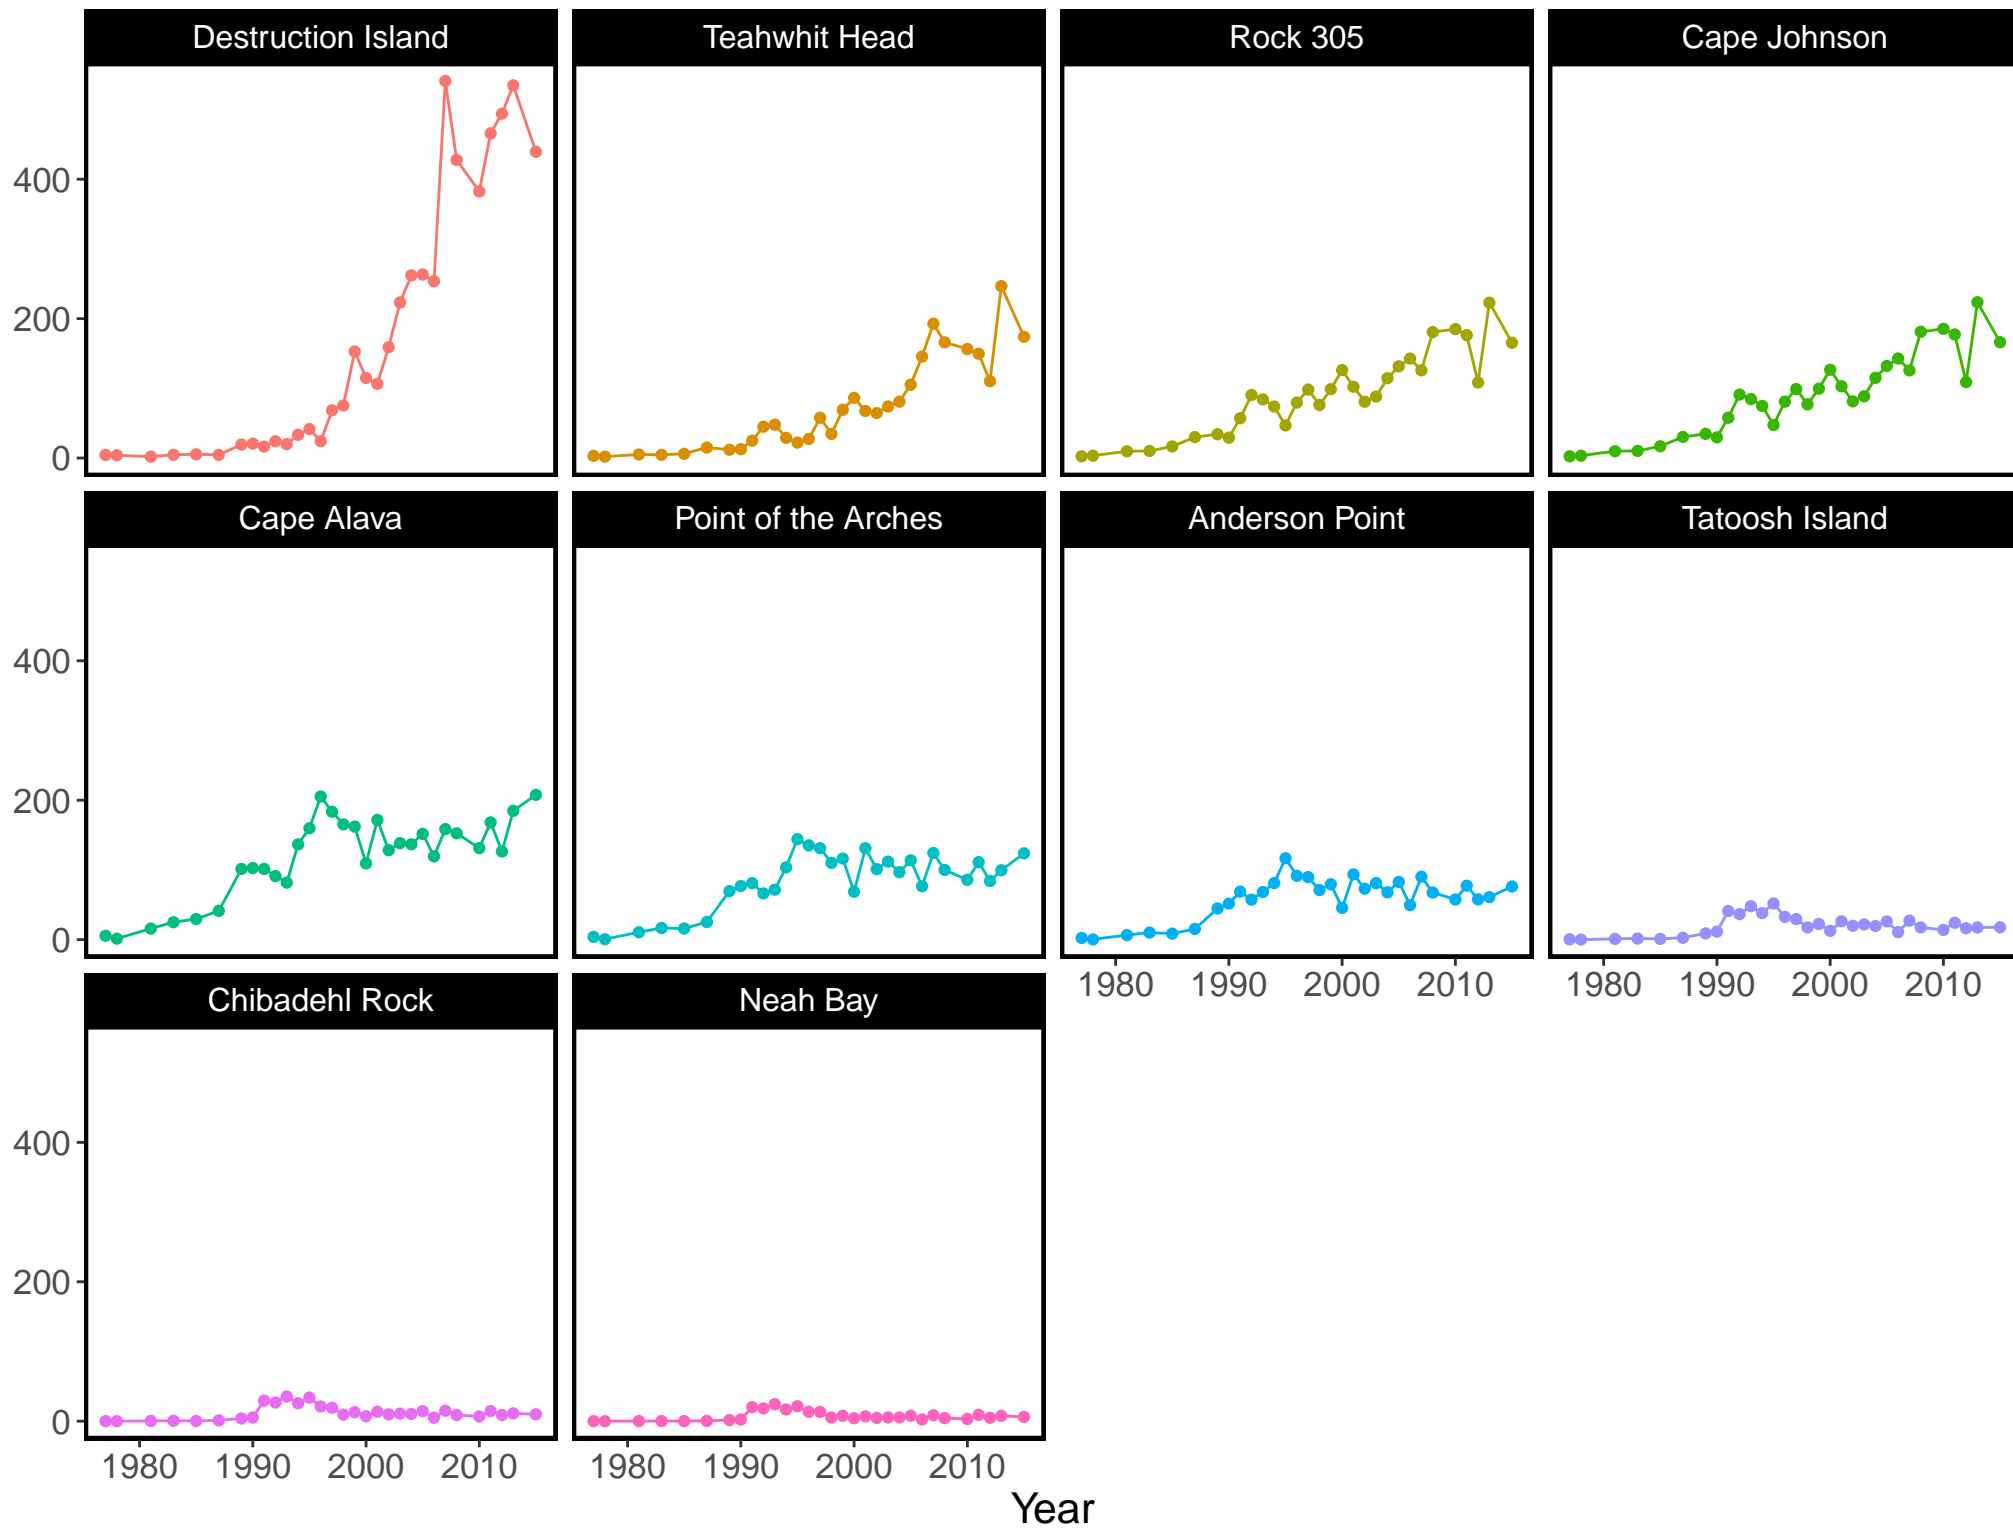

- Destruction Island
- Teahwhit Head
- Rock 305
- Cape Johnson
- Cape Alava
- Point of the Arches
- Anderson Point
- Tatoosh Island
- Chibadehl Rock
- Neah Bay

Year

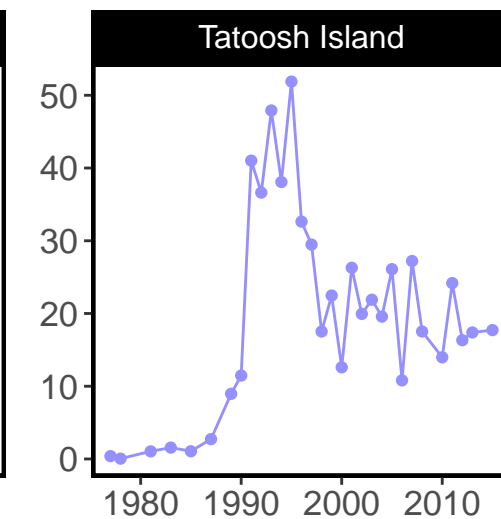

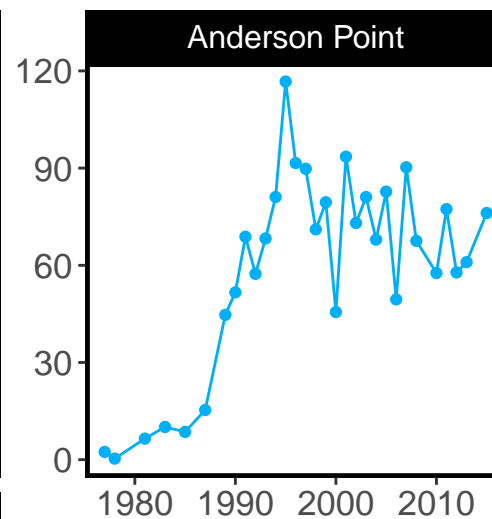

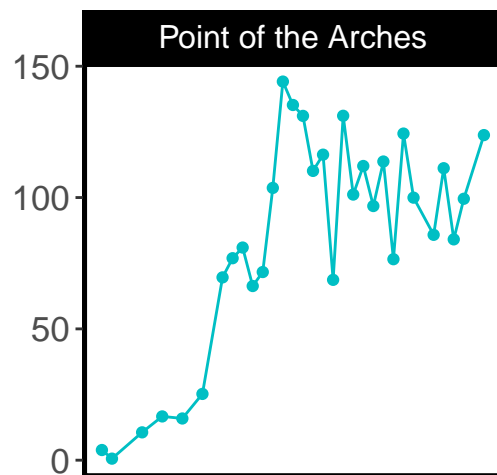

Kernel population estimates, kernel= 10.2 ; 10 km buffer

Number of Sea Otters

Kernel population estimates, kernel= 10.2 ; 10 km buffer

Number of Sea Otters

Year

Kernel population estimates, kernel= 10.2 ; 10 km buffer

Proportional Distribution; kernel = 5.1

location

- Destruction Island
- Teahwhit Head
- Rock 305
- Cape Johnson
